Final Project Rubric

Week 1

New Features

1. Create music library representation as a collection of related classes.
2. Add ability to load the music library from a location on the disk.
3. Add ability to parse a file from the disk into the program as a Song:
 - a) Shall correctly differentiate between music files and others.
 - b) Shall parse song metadata (artist, album, etc.).
4. (didn't have time for a fourth req.)

Testing

1. Automated test suite covering any changes in non-UI classes is present.
 - a) Tests should aim to cover all equivalence classes of inputs and be appropriately complex.
 - b) Tests should be built separately from the release version of the code.
