Final Project Rubric

Week 2

New Features

1. Add Playlist functionality as a user-created, sequential list of songs.

2. Add to each music library class (including Playlist) conversion into a JSON-like string representation for saving/loading from a file.

3. Add ability to create each music library class from their respective JSON-like strings.

4. (TODO)

Testing

1. Automated test suite covering any changes in non-UI classes is present.

    a) Tests should aim to cover all equivalence classes of inputs and be appropriately complex.

    b) Tests shall be built separately from the release version of the code.
